

OMS Client Technical Requirements

1 Machine configuration

	Minimum	Recommended
Operating System	<ul style="list-style-type: none"> Microsoft Windows 	<ul style="list-style-type: none"> Microsoft Windows
OS Version	<ul style="list-style-type: none"> Windows XP SP2 	<ul style="list-style-type: none"> Windows XP SP2
Hardware ¹	<ul style="list-style-type: none"> 1 GHz Intel Pentium processor with 512MB installed RAM 	<ul style="list-style-type: none"> 2 GHz Intel Pentium processor with 2GB installed RAM
Software	<ul style="list-style-type: none"> Microsoft .NET Framework Version 1.1 Redistributable Package Microsoft .NET Framework Version 2.0 Redistributable Package 	<ul style="list-style-type: none"> Microsoft .NET Framework Version 1.1 Redistributable Package Microsoft .NET Framework Version 2.0 Redistributable Package
Free Disk Space ²	200 MB	300 MB

The figures quoted above are indicative and are provided as a guide.

2 Microsoft Service Packs

All Microsoft service packs are supported but no service pack is actually required. However, it is always recommended that the latest service pack(s) be installed.

Windows XP with SP2 is supported.

Later versions of Windows are NOT supported at this time.

¹ The application will typically require 50-100Mb of memory and it is assumed that sufficient system resources are available to support this

² The application will require at least 120Mb for installation, but allowances should be made for log files and temporary files
